KISHORE DANDA Corporate Trainer

Kishore Danda, has close to two decades of experience as a trainer and is adept in dealing with Teachers, students and Corporate clients. He had vast experience of teaching both in India and Abroad in some of the universities like **Raffles and Binary**.

He was also associated with multinational companies like **Infosys, CSC and iSOFT**. He worked in different departments and in various capacities. The testimony of his abilities is starting his career as an RJ and moving on to become a **Director** and also working through the length and breadth of various verticals spanning Teaching, Quality Assurance, Audits, Process Trainings, and not only to handle but to turn around multiple high risk projects.

He was a star performer and a **Top Trainer** at some of the multinational companies. He had trained best techies from **IITs**, Managers from reputed **business schools, Corporates** and **IIMs**.

“We don’t rise to the level of our expectations, we fall to the level of our training.”

He is the **founder** of **THE IKIGAI, Centre for Life Skills** and **Co-founder** of UniMindz Services & Technologies LLP, which are into Recruitment, Corporate Trainings and Software Development. Their achievement was building a Numero uno platform-EdVertex, which is being used by some of the best universities and reputed organizations of our country.

He visited various Universities, Colleges, and Schools for **College Connect** and **Train the Trainer programs**, to empower youth with the required Life Skills and providing career counselling. He is also an **Art of Living Teacher** and is working on transforming lives of individuals and professionals by helping them overcome stress and leading a quality life.

Training Methodology

Based on the experience gained from the work done for the last two decades, we developed a unique training methodology which is an Eight fold path. On a broader perspective, this methodology consists of eight steps each flowing into the other.

Meeting with management | Understand concerns | Identifying stake holders | Team meetings | Finalising parameters for improvement | Course development | Conducting workshop or Project execution | Collecting feedback.

**If you have any training requirement for your Employees, Faculty or Students,
Please reach us @**
